

ELECTRITEK

Single and three phase, low and medium voltage, dry type and oil filled, pad-mount, pole-mount, cast coil, power and substation type transformers.

Industrial automation devices, including switches, sensors, signal lights, relays, counters, timers, and controllers.

Energy-saving transmission motors, torque motors, and DPS Digital Phase Converter, allowing for running of three phase motors from single phase power.

Stock and custom-made enclosures, offering a wide range of colors, ventilation, hardware, and accessories.

LED lighting, solar LED lighting, solar panels, and battery storage solutions, including for residential, industrial, and utility grade applications.

Power factor correction products, including fixed and automatic switched capacitors for low-voltage and medium-voltage applications.

Scalable, modular, and compact UPS systems in a range of power ratings and standby, line interactive, online, and isolated online configurations.

Battery chargers and monitoring solutions, DC power systems, inverters, and a wide range of battery types.

ELECTRITEK

ADELSYSTEM

Industrial power supplies, DC UPS solutions, and battery chargers for all applications in fields of industrial automation.

Energy and power monitors, protection and control products, current transformer, and low voltage switchgear.

Electrical insulation testing and protection systems for critical equipment operating up to 15 KV.

Absence of voltage tester, neutral grounding resistors, high resistance grounding, and protective grounding relays.

LED Lighting solutions and electronic message displays with a diverse portfolio of solutions for a wide range of projects.

SOFT STARTERS

Low & medium voltage soft starters ranging from 4 KW – 50 MW, motor controls, and motor protection. Contact Electritek for details.
